

EASY PAINT

Taro Morimoto

BACKGROUND

- I'm an amateur painter
- I like to paint portraits but it takes SOOO much time
- Combination of shapes and colors this makes a painting
- I want to paint faster and concentrate only on the expressive part

OVERVIEW

- A multitouch app that allows amateurs to make photos into paintings
- You don't need to worry too much about shapes and colors
- Think of Photoshop water-colour effect but painting the effect on to the photo one stroke at a time

FEATURES

- Load a photo to paint
- Touching the photo generates paint-like brush effect based on the colors in the part of photo that is touched
- Zooming in with a pinch controls the detail of the brush
 - More you zoom in more detailed brush you'll get
 - Zoom controls the absolute size of the brush

EXTRA FEATURES

- Manual layers or
- Automatic layers where each stroke is recorded in a layer based on the zoom factor
 - E.g. have a layer every 10% zoom steps
- Transparency of the brush
- Smoothness of the brush
- Different types of brushes
 - Oil-paint, watercolor, pencil, charcoal
