Famed Artists to Paint Historic Flatiron Building Using MobiSpray

Historic Week for Consumers and Businesses Caps Off Clearwire's 4G Mobile Broadband Launch in New York City

--(BUSINESS WIRE)--Clearwire Corporation (NASDAQ: CLWR):

WHAT: Clearwire Corporation (NASDAQ: CLWR), a leading provider of wireless broadband services and operator of the first 4G network in the country, officially launched CLEAR[®] 4G take-it-with-you internet service on November 1. To continue the celebration of the launch of service, Clearwire is inviting the community to come help Jürgen Scheible, the inventor of MobiSpray, and local graffiti artist Andy Dolan (AKA PURE) paint the façade of the Flatiron Building.

“Why would I want to watch paint dry?”

If you are thinking to yourself, “Why would I want to watch paint dry?” think again. The artists will be using MobiSpray, which is an interactive digital art experience that turns a mobile device into a virtual spray-can that can project artistic creations and visions onto buildings.

Jürgen and PURE will be showing off their artistic capabilities for the first hour, then CLEAR will invite the public to “paint” the side of the Flatiron Building with their own artistic renderings. Photographers will be onsite snapping photos of everyone’s work, which will then be posted to CLEAR’s Facebook page.

WHERE: Flatiron Building, New York City
5th Avenue between 22nd and 23rd Street

WHO: Jürgen Scheible, Inventor of MobiSpray
Andy Dolan (AKA PURE), New York City expert graffiti artist

WHEN: November 5, 2010
6:00 p.m. to 10:00 p.m.
