Network of Intelligent Sonic Agents

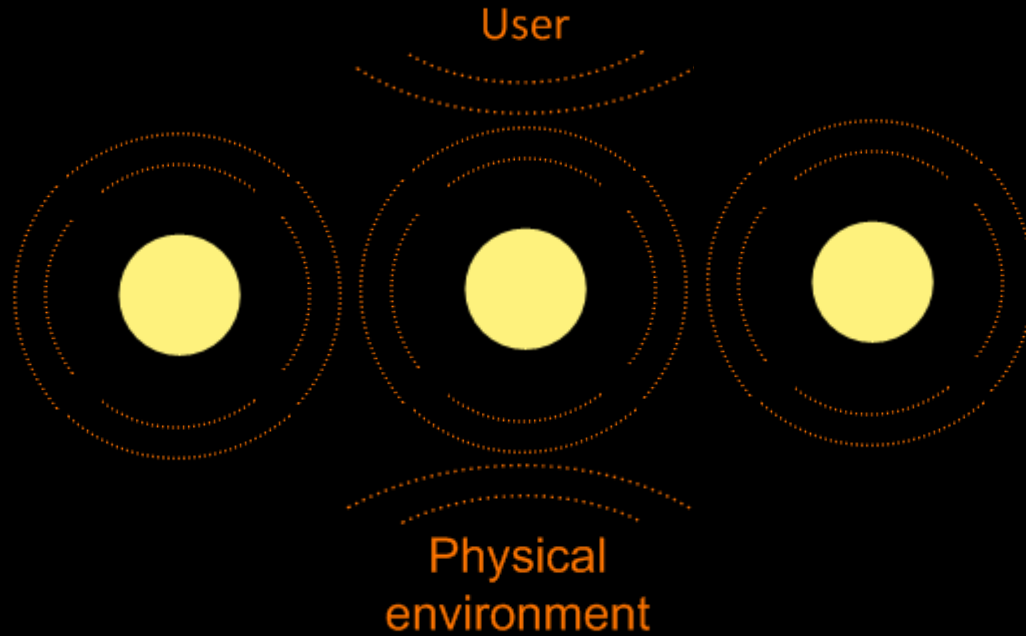

Sound and Physical Interaction (SOPi)

K. Tahiroğlu, T. Svedström, V. Wikström

Introduction

- ★ Goal: Create an intelligent system, that acts to maintain and deepen the users engagement by learning from the user behaviour while interacting with digital environments
 - Machine learning: adapting to the users behaviour and predicting the most favorable system actions
 - Engagement: detecting the motivation from body movements and facial expressions

Network of Intelligent Sonic Agents

Preliminary video

A decorative graphic consisting of several colored rectangular bars and rounded corners. A vertical purple bar is on the left. A horizontal blue bar is below it, extending to the right. A horizontal purple bar is below the blue one. A horizontal yellow bar is below the purple one. A horizontal red bar is below the yellow one. A vertical yellow bar is on the far right. The text 'Thank you!' is centered in orange.

Thank you!
